New Archives JFK assassination lisison 6/15/93

In today's mail, with no return address or inside message, I received the enclosed new (June 10) Archives internal memo on the designation of Steven Tilley to serve as liaison with other agencies and the presidential libraries on the disclosure of JFK assassination records.

I do not recognize the handwriting on the envelope.

Nobody I know would address the envelope as it is addressed.

I therefore believe that this was sent anonymously by an Archives employee who had heard of me and my work or saw records relating to me. Belief it is the latter is the zip code, canhed at least a year ago.

This is not classified, not properly classifiable, certainly not secret, so I wonder why the one who sent it wanted not to known.

Even if an NARS employee.
